

## Dear customer.

Welcome to the Funballz family, it is with great pleasure that we send you one of our quality products made by Funballz.com. We can imagine that you are looking forward to using it, and to make sure that you and everybody that comes in contact with our product is as safe as possible. We kindly ask you to read the attached user manual and follow all safety rules and regulations provided by Funballz.

## Quality.

Funballz's goal is to become the leading supplier of inflatable water toys in the world. Our focus is unique products with extremely high quality. We work constantly to ensure that Funballz only uses the best material, technology and processes available in the market at all times.

## Environment.

Funballz is always on the look out for ways to become more friendly to the environment. Our search has lead us to a cooperation with a danish company that recycles our old and used products. All our customers are encouraged to send us our outdated products and we will make sure that they become beautiful new products from Grunbag.dk.

## Partners.

Funballz has worked together with a wide range of companies, organisations and private people. Lately we have worked with Dyreparken, Fanta, Telenor, Novartis, TV Norge, TV2, Fredrik & Phillip, Senkveld, 71° Nord and many many more.

We are very proud of our cooperation with the Norwegian Swimming Federation, especially during the competition "Swim to Cyprus" that we sponsored. We hope to get many new partners and friends in the future, so feel free to contact us if you have any questions.

## Funballz- makes people smile..
